PROFESSIONAL SUMMARY

IT Engineer with a strong interest in Cybersecurity and a solid foundation in information security principles, vulnerability assessment, and secure coding practices. Passionate about building secure and scalable applications, with hands-on experience in the MERN stack. Possesses domain knowledge in cybersecurity concepts and continuously works towards deepening expertise in security engineering and risk assessment.

EDUCATION

Mahatma Gandhi Mission's College of Engineering and Technology (MGM CET), Navi Mumbai, India
B.E. in Information Technology – CGPA: 8.20 Nov 2022 – Jun 2026

OPEN SOURCE CONTRIBUTIONS

MobSF (Mobile-Security-Framework-MobSF) GitHub · Dec 2025

- Contributed to core MobSF engine by enhancing error handling and logging in MalwareDomainCheck module (Merged PR #2555).
- Implemented granular exception handling (FileNotFoundException, PermissionError, IOError) to prevent runtime crashes in production scans.
- Added pre-flight database validation checks and URL/domain input validation for improved reliability.
- Enhanced logging with traceable progress tracking; ensured graceful degradation on failures.
- Successfully passed lint, QA checks, and merged into MobSF master branch after review by maintainers.

TECHNICAL SKILLS

Programming: C, C++, Python, Java, JavaScript, SQL
Cybersecurity: OWASP Top 10, Static & Dynamic Analysis, Secure Coding, Android Security, Malware Analysis
Security Tools: MobSF, Wireshark, Burp Suite, Nmap, Metasploit, ProcMon, Regshot, PeStudio, Nikto, OwasP ZAP
Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Software Engineering

PROJECTS

BlackHawk-75-Checkmate – Android Static Analysis Framework Oct 2024 – Dec 2024

- Developed framework to detect vulnerabilities and anomalies in Android apps pre-deployment using software engineering practices.
- Integrated MobSF, SonarQube, Android Lint for automated scanning and CVE analysis in mobile development.
- Applied ML models (SVM, Random Forest, Isolation Forest) for anomaly detection and code scoring.
- Automated reports (PDF/JSON) and CI/CD integration for DevSecOps workflows.
- Repo:** github.com/kokatesaurabh/BlackHawk-75-Checkmate

D3scord – Decentralized Communication Platform May 2024 – Aug 2024

- Architected Web3 messaging platform with openzapplin ERC-721.
- Developed Solidity contracts with Ethers.js for blockchain identity and data management.
- Built React.js frontend with Socket.io for real-time P2P communication.
- Engineered scalable verification and transaction auditing architecture.
- Repo:** github.com/kokatesaurabh/D3scord

Cyber-Jarvis – AI Cybersecurity Assistant Dec 2023 – Mar 2024

- Developed a modular AI assistant for cybersecurity automation, integrating OSINT, vulnerability scanning, hash cracking, steganography, and AI jailbreak.
- Implemented text-to-speech, video playback, and object detection for enhanced interactivity.
- Designed scalable architecture for easy integration of new tools and modules.
- Repo:** github.com/kokatesaurabh/Cyber-Jarvis

ACHIEVEMENTS

Finalist – Smart India Hackathon 2024

- Led ML-based anomaly detection for Android Applications; national finalist presentation at IIT Jammu. **Certificate:** View Certificate

Project Presenter – Tantravihar 2025 (State Level Project Competition)

- Presented KN-78 Knightmare LLVM obfuscation framework for resilient Windows/Linux binaries via control flow flattening, bogus insertion, substitution, and encryption against reverse engineering. **Certificate:** View Certificate

Advent of Cyber 2025 Participant

- Completed cybersecurity challenges in TryHackMe's Advent of Cyber 2025, gaining hands-on experience in ethical hacking, forensics, and security concepts. **Certificate:** View Certificate

Competitive Programming

- Solved 400+ LeetCode problems; active in contests for DSA and problem-solving skills.
- Completed GFG 160 Days Challenge; progress on X and GFG. **Certificate:** View Certificate
